

SQE Engineer

The role

We are looking for an experienced SQE Engineer, with a working knowledge of the Rail Industry, to join our SQE Department based at our Head Office in Coventry.

You'll be responsible for ensuring the existing management systems we use are maintained and for the continual auditing of these systems and existing procedures. As well as providing support to the rest of the SQE team you'll be required to visit sites around the UK to complete auditing of works against procedures and management plans.

Ideally you will hold a formal audit qualification and you'll be NEBOSH & IEMA certified and have first-hand experience of fronting RISQS audits.

Using your excellent communication skills, you'll be confident in dealing with colleagues and clients at all levels, mentoring and coaching when appropriate, taking charge and giving specific instructions and direction when required. You'll be able to review a situation from all perspectives and make decisions that work for all involved parties.

So, if you're a team player with a high degree of professionalism, someone who enjoys problem solving and managing change, and are motivated, flexible with a can-do attitude you could be just the person we are looking for to join our team

To apply for this role please send you CV and a covering letter telling us why you'd like to come and work with the team here at Optilan and what you can bring to this role.

Please make sure you include details of your current salary and notice period and send it to our HR team at recruitment@optilan.com.
