

## Senior Commissioning Engineer

### The Role

We are looking for a Senior Commissioning Engineer to work on National Grid sites in and around the UK.

You'll be responsible for providing full site commission, configuration and testing of supplied systems against pre-determined test documentation procedures. Providing detailed daily reports to the Field Services Manager, you'll also ensure the completion of works within project timescales and be responsible for the management and control of variations with the client.

You 'll have detailed technical Installation & Commissioning knowledge of 5 or more of the preferred sub systems and a minimum of 3 years site commissioning experience. Ideally, you'll have an excellent understanding of CCTV, PABX, PA, Cardax and Synetics.

Using your excellent communication skills, you'll be confident in dealing with colleagues and clients at all levels, mentoring and coaching when appropriate, taking charge and giving specific instructions and direction when required. You'll be able to review a situation from all perspectives and make decisions that work for all involved parties.

So, if you're a team player with a high degree of professionalism, someone who enjoys problem solving and managing change, and are motivated, flexible with a can-do attitude you could be just the person we are looking for to join our team.

To apply for this role please send you CV and a covering letter telling us why you'd like to come and work with the team here at Optilan and what you can bring to this role.

Please make sure you include details of your current salary and notice period and send it to our HR team at [recruitment@optilan.com](mailto:recruitment@optilan.com)
