

## Installation Engineer

### The role

We are looking for permanent installation engineers to support a number of projects across National Grid, Rail and City Fibre.

You will be a qualified fibre splicer, with previous experience of fibre installation and testing. Additional experience in copper jointing and testing is a real plus, as is experience of working on National Grid sites and relevant additional training and qualifications.

You will need to be able to work on your own and as part of a team. You will also need to be flexible, able to work away from home as needed and be prepared for working at heights and in confined spaces. These roles also require a full UK driving licence.

Working patterns will include an on-call rota and occasional weekend working.

If you are professional, motivated and flexible, with strong technical skills and a can-do attitude, you could have what it takes to thrive here. You will be looking for a permanent role and the chance to build a career with a business that is growing rapidly.

To apply for this role please send you CV and a covering letter telling us why you'd like to come and work with the team here at Optilan and what you can bring to this role.

Please make sure you include details of your current salary and notice period and send it to our HR team at [recruitment@optilan.com](mailto:recruitment@optilan.com).
